EDUCATION

Indian Institute of Technology (BHU) Varanasi, India
Bachelors of Architecture

Nov 2021 - Jun 2026
CGPA: 7.98

TECHNICAL SKILLS

Programming languages: Python, JavaScript
DS/ML: SQL, Pytorch, Numpy, Pandas, Matplotlib, SKlearn, Seaborn, PowerBI
Web Scraping/Frameworks: HTML, CSS, Requests, Playwright, Selenium, BeautifulSoup, Playwright
Area of Interest: Data Science, Machine Learning, Deep Learning, Time Series, Web Scraping

PROJECTS

Dream 11 Team Predictor Dec 2024

- Developed a Dream 11 **fantasy prediction** platform using temporal modeling, focusing on **explainability** and user insights.
- Analyzed team dynamics and performance variability for cricket match data in all formats from 2001 for **11k+ players**.
- Scraped** cricket data from **ESPNcricinfo** and other sources to build a **generative AI-powered chatbot** and better prediction.
- Developed a **hybrid** model combining the TCN, GNN, and Bayesian adjustment methods and achieved **80%** accuracy.
- Finally, used and **deployed** with XGBoost for enhanced explainability with **SHAP and LIME** achieved **60%** accuracy.
- Exposure:** Time-Series, Web Scraping, Genrative AI, XGBoost, Explainable AI, Node.js, UI/UX Design.

AI-based trending Newsletter | Real-Time Google Trends July 2024

- Implemented an automated system to fetch **real-time** Google trending searches from different countries using RSS feeds.
- Applied NLP, **Cosine Similarity** to drop duplicates and topic-wise categorization, used **Jinja2** to design email template.
- Integrated **Gemini 1.5 pro** model with few-shot training and **prompt tuning** to generate concise and clear **news summaries**.
- Designed a pipeline to schedule **automatic emailing** daily summarized news updates to **50+** subscribers using API.
- Saved **25+ hours** using Gen AI and automation and worked on template designing with CSS to enhance user experience.
- Exposure:** Generative AI, Natural Language Processing, Web Scraping, API Integration, GitHub Actions

Car Price Prediction | KaggleX Skill Assessment Challenge Aug 2024

- Developed a model to predict used car prices using **12+ features** like brand, mileage, engine, and transmission.
- Implemented Random Forest, XGBoost, an **ANN with dropout**, and feature imputation for **out-of-box test** cases.
- Handled data irregularities, including up to **8% missing** values in a 54k-row dataset, achieving an MSE of **69,881**.
- Ranked in **Top 10% among 1,900** global participants by optimizing performance through **feature engineering** techniques.
- Worked on a dataset **generated** by a Deep Learning model with 71k+ rows of used car price prediction data.
- Exposure:** Feature engineering, Artificial Neural Networks, Machine Learning, Data Visualization

Josaa Open Close Rank Scraper Feb 2024

- Leveraged Selenium framework to scrape over **10k+ rows** of dynamic data from the Josaa **IIT-NIT counseling website**.
- Collected data of every class and gender-based cutoff for admission in all institutes across **6 rounds**, tested over 3+ years.
- Engineered features to **clean and preprocess** Josaa data, enhancing usability and modularity for future applications.
- Analyzed and forecasted using XGBoost and **time series** models, but data constraints and external factors limit accuracy.
- Exposure:** Selenium, Playwright, Web Scraping, Pandas, Data Cleaning, Machine Learning.

ACHIEVEMENTS

15th in InterIIT Tech Meet	Dream 11 PS; Dream11 team predictor with interactive UI and full-stack deployment.	2024
10th in InterIIT Tech Meet	Represented IIT BHU in the Mid-Prep competition of Crypto Trading Challenge.	2023
2nd in Synergy, IIT KGP	Runner-up in esteemed competition in the stock market with participation 400+ teams.	2023

POSITIONS OF RESPONSIBILITY

Co-Head, BASH 6.0 Business Club 2023 - 2024

- Led BASH, an international event organized by the Business Club IIT BHU, with **2500+ participants** from **6+ countries**.
- Organized 10+ competitions and events by **collaborating** with industry leaders and collecting a prize pool of **220k INR**.

Senior Core Team Member, Business Club 2022 - 2024

- Mentored **30+ junior** members and 100+ freshers by **brainstorming sessions** in diverse fields in finance and Data.
- Collaborated with teammates and senior members to organize a finance competition with **1500+ freshers** participating.

Core Team Member, Social Projects' Club 2023 - 2024

- Worked on a project with **10+ members**, solving problems of visually impaired persons by **identifying objects** in real-time.
- The 'SARTHI' project integrates **YOLO v7** object identification model and **text-to-speech API** for real-time audio output.
